

July/August Tech Tips 2017

Version 20 Previews

The Church Windows programmers are coding and testing all the new updates and features in Version 20. We are excited to see all the amazing changes and flexibility that Version 20 brings to the Church Windows program. While the new version is not due for release until Fall, you can watch a prerecorded [Version 20 Preview](#), or sign up for [Live Webinars](#).

When coming from a version prior to 17 to Version 20, it may be necessary to have us update your data through the different versions and then to 20. We have a great document – [Prior to Updating to Current Version](#) – which guides you through recommended steps to take before moving from a version prior to Version 17. Also take a look at the documents and videos available on our [Conversion page](#) if you are just now converting from Financial to Accounting or Contributions to Donations.

Did You Know?

If you unsubscribe from any of our email notifications, you are unsubscribed from all emails from Church Windows. We highly recommend subscribing to Church Windows email notifications so you don't miss important communication regarding updates, service releases and other important information. We try to keep our emails to a minimum. Also if you have had staff changes, it never hurts to send an email to support@churchwindows.com including your current email address and contact information. We can then check to confirm we have the correct data on file for your church.

Can't Find What You Need?

In the upper right of our website www.churchwindows.com, click on the magnifying glass and type in a word or phrase to search the website for what you need.

Time to Learn

If things are a little slower and less hectic during the summer months at your church, take advantage of the free time and sign up for a live webinar or view a prerecorded webinar. You can find a list of topics and sign up for [Live Webinars](#). Or you can view [Prerecorded Webinars](#) whenever it is convenient. The webinars are free, usually last around twenty-minutes and cover different topics for all the modules.

Backing up

Remember to regularly make backups of your data. Back up often to prevent possibly having to re-enter data! You can perform this function yourself, and it only takes seconds. Don't depend on someone else. A secondary backup never hurts even if your data is hosted on Church Windows Web.
